Teachers from 20 schools (10 = phase 1, 10 = phase 2) will complete SDQ questionnaires for children who could benefit from the programme (N = 240, 120 in each phase, 6 intervention & 6 waiting list control children in each school). Parents of children with the 12 highest scores on the SDQ in each school will receive an information sheet and a ‘Note of Interest’ form. Interested parents are asked to send the completed ‘Note of Interest’ form containing their contact details to the research team.

- ‘Note of Interest’ form received (n = )
  - Parent contactable (n = )
    - Agreed to home visit (n = )
      - Signed Consent received (n = )
        - Baseline:
          - Teacher completed measures (n = )
          - Parent completed measures (n = )
          - Child completed measures (n = )
      - Signed Consent declined (n = )
        - Child not eligible for participation (n = )
  - ‘Note of Interest’ form not received (n = )
    - Parent not contactable (n = )
      - Declined home visit (n = )

Randomisation (n = 240)

Allocated to intervention group (n = 120)
- Follow-up 1:
  - Teacher completed measures (n = )
  - Parent completed measures (n = )
  - Child completed measures (n = )

Follow-up 2:
- Teacher completed measures (n = )
- Parent completed measures (n = )
- Child completed measures (n = )

Per protocol analysis (n = )
Intention-to-treat analysis (n = 120)

Allocated to control group (n = 120)
- Follow-up 1:
  - Teacher completed measures (n = )
  - Parent completed measures (n = )
  - Child completed measures (n = )

Per protocol analysis (n = )
Intention-to-treat analysis (n = 120)
