Figure 1: Study design and flow chart

Number of practices in participation PCTs: 98

Number practices recruited to study: 49

Practice randomisation by size and PCT:
- Intervention (ICCD): 24 practices
- Control: 25 practices

Patients with T2DM (n=12,340):
- Intervention: 5,606
- Control: 6,734

Patients consenting (n=1,997):
- Intervention: 1,057
- Control: 940

Final assessment (18 month follow-up):
- Intervention: 644
- Control: 636
