All comers with symptomatic coronary artery disease or coronary artery stenosis > 70% by visual estimation receiving percutaneous coronary intervention

Eligibility screened [Table 1]

Aspirin (300mg) + Clopidogrel (300~600mg) p.o.
Informed Consent

Platinum-chromium based everolimus-eluting stent
N = 2500

Cobalt-chromium based zotarolimus-eluting stent
N = 1250

200mg Cilostazol loading
N = 1875

No Cilostazol loading
N = 1875

VerifyNow® ASA & VerifyNow® P2Y12 after 12~24 hours post-PCI

100mg Aspirin QD
75mg Clopidogrel QD
100mg Cilostazol BID

100mg Aspirin QD
150mg Clopidogrel QD

Net clinical outcome at 1 month post-PCI (ITT)

100mg ASA, 75mg Clopidogrel

Cumulative TLR at 12 months post-PCI (ITT)
