Figure 1. The selection process for studies included in the systematic review

- Potentially relevant studies identified: citations or abstracts screened for retrieval (n=925)
- Studies excluded (n=888)

- Full studies retrieved for more detailed evaluation (n=37)
- Studies excluded, with reasons (n=27)

- Studies included in analysis (n=10)
- Studies withdrawn, by outcome, with reasons (n=1)

- Studies with usable information, by outcome (n=9)
