The bar chart compares the prevalence of various adverse childhood experiences (ACEs) between women and men. The ACEs listed include:

- Incarcerated household member
- Household drug use
- Mental illness in household
- Parental separation or divorce
- Domestic violence
- Emotional neglect
- Physical neglect
- Sexual abuse
- Emotional abuse
- Physical abuse

The chart indicates the percentage of individuals who have experienced each ACE, with bars showing the number of positive responses (Yes) and negative responses (No). The data is presented for women and men separately.
