A. Context Evaluation: Describe context; Identify needs and opportunities

B. Input Evaluation: Assess competing methods; Ensure project feasibility

C. Process Evaluation: Ensure process efficiency for timely delivery of quality outputs

D. Formative Product Evaluation: Improve product (results) quality

E. Summative Product Evaluation: Document product (results) quality

F. Follow-up Evaluations With Clients/Users: Tracks and assesses project outcomes/impacts

Design and Scoping Decisions: What objectives to accomplish?

Structural Decisions: What resources, tools and methods?

Reiteration Decisions: Is output ready for dissemination/distribution?

Implementation Decisions: What is the optimal process to achieve desired output?

DISSEMINATE/DISTRIBUTE RESULTS

End Project

Install/Continue Project
