(a) (b) (c)

(a) 3D rendering of the patient's anatomy with color-coded dose distributions.
(b) 2D cross-section showing regions of interest.
(c) Graph showing dose-volume histograms (DVH) for different regions:
- pCT PTV Boost
- pCT PTV1
- pCT PTVring1
- pCT PTVring2
- pCT Rektum
- CBCT Rektum deform
- pCT Blase
- CBCT Blase deform

The graph plots dose in Gy on the x-axis and volume in % on the y-axis, illustrating the dose coverage and volume at various dose levels for each region.
