The diagram shows the local control rate over time (in months) for different treatment groups. The x-axis represents time (months) ranging from 0 to 60, and the y-axis represents the local control rate ranging from 0.0 to 1.0.

The line with blue crosses represents the local control rate for patients with chemotherapy, while the line with green squares represents patients without chemotherapy. The text box indicates that the p-value is 0.416, suggesting no significant difference between the two groups.
