The bar chart shows the percentage of GU (acute) and GI (late) effects across different groups. The x-axis represents the treatment types: Mono and Boost, while the y-axis represents the percentage ranging from 0% to 100%. The groups are indicated with different patterns: G3, G2, G1, and G0. The chart indicates a significant difference with P-values: P=0.046 and P<0.001.
