The bar chart shows the percentage of patients in G2 and G1 groups across different time intervals (1-5, 6-12, 13-24, 25-36, and 37-48 months) after initial therapy. The y-axis represents the percentage, ranging from 0 to 16, and the x-axis represents the time intervals in months.

- **1-5 months**: G2 has 5.2%, G1 has 3.9%.
- **6-12 months**: G2 has 6.6%, G1 has 2.7%.
- **13-24 months**: G2 has 8.5%, G1 has 5.3%.
- **25-36 months**: G2 has 9.1%, G1 has 4.1%.
- **37-48 months**: G2 has 3.6%, G1 has 1.0%.

The chart indicates a statistically significant difference (P = 0.001) between G2 and G1 groups, particularly in the 13-24 months period.
