Figure A: Box plots showing the distribution of sHsp70 levels in healthy and before therapy groups. The box plots indicate a significant difference with a p-value of \( p < 0.001 \) (***).

Figure B: Comparison of sHsp70 levels between the high and low groups. The box plot on the left shows a higher median and interquartile range in the high group compared to the low group.

Figure C: Receiver Operating Characteristic (ROC) curve. The area under the curve (AUC) is 0.91, indicating a high sensitivity and specificity.

Values, A = 0.91
