Tendon oxygen saturation [%]

- Insertion: $p = 0.336$
- Distal mid-portion 2cm: $p = 0.568$
- Middle mid-portion: $p = 0.217$
- Proximal mid-portion: $p = 0.395$

The graph compares tendon oxygen saturation between Eccentric Training control and Eccentric Training after 12 wks at different locations.
