AI H5-inhibition ELISA – two subsequent assays, using H5N7ag/H5N2ag

Specificity:
Latest blood sample p.i. with positive HI titer
Sensitivity:
First blood sample with positive HI by H5N7ag

AI H7 inhibition ELISA – two subsequent assays, using H7N1ag/H7N7ag

Specificity:
Latest blood sample p.i. with positive HI titer
Sensitivity:
First blood sample with positive HI by H7N1ag
