The graph shows the concentration of Ribulose 1,5 bisphosphate, ATP, and ADP over time. The x-axis represents time in seconds, ranging from 0 to 35. The y-axis represents concentration in mmol·L⁻¹.

- Ribulose 1,5 bisphosphate: The concentration starts high and decreases over time, leveling off near 1.5 mmol·L⁻¹.
- ATP: The concentration rises sharply at the beginning, peaks, and then decreases, stabilizing near 1 mmol·L⁻¹.
- ADP: The concentration starts at a low level and increases gradually over time, reaching a stable value near 1.5 mmol·L⁻¹.
