\[ \frac{dT_i}{dt} \propto D_i \text{ (SITS)} \quad \frac{dT_i}{dt} \propto \text{Const} \text{ (TS)} \]

- (A) \( L = 250 \)
- (D) \( L = 160 \)

- (B) Telomere length, \( \langle T \rangle, \text{[kbp]} \)
- (C) Number of mutations, \( \langle M \rangle \)

- (E) Mutations as a function of cell doublings
- (F) Mutations as a function of cell doublings
