**Figure 3: Global Acute Malnutrition Rates and Supplementary Feeding Program Enrollment**

*MAM prevalence was calculated as the difference between GAM and SAM prevalence from 2008 surveys reported in UNHCR Nutrition Survey database or most recent year where 2008 data not available; all prevalence data measured using WHO growth standards except for Gasorwe and Musasa (Burundi), Awbarre and Kebribeyah (Ethiopia), Wad Sharifey (Sudan), and Basteen and Kharaz (Yemen) which only reported GAM and SAM prevalence using NCHS growth standards. Note: GAM and SAM prevalence were measured across multiple camps in a joint survey in Amboko & Gondje (Chad); Adjumani, Impevi, Kiryandongo, Palorinya & Rhino (Uganda) and Kyaka, Kyangwali, Nakivale, & Oruchinga (Uganda).*
