Figure 2 Histopathological photos A) collagen denaturation can be seen in partial mesenchyme. Branch-like blood vessels were visible (H-E stain, original magnification $\times 100$). B) spindle and oval tumor cells and stromal sinusoid can be observed (H-E stain, original magnification $\times 200$). C) CD34 immunohistochemical stains, tumor cells reacted positive for CD34. D) Bcl-2 immunohistochemical stains, tumor cells reacted strongly positive for Bcl-2.
