Clinical presentation, symptoms

- Anaemia
- Leukopenia

Medical history (autoimmune diseases, sepsis, renal pathologies)

Laboratory exams: haematological test (with reticulocytes count), biochemistry, blood culture (in case of febrile leukopenia)

- Peripheral blood smear

Tumour assessment to exclude tumour progression (CT scan, stool blood, colonscopy, EGDS)

- Coombs test

Autoimmunity panel: ANA, pANCA, Ab anti-ASMA

Bone marrow biopsy (to exclude tumour invasion of the bone marrow)
