The graph shows T-scores for different dimensions assessed in adolescent and mother reports.

- **T-scores** range from 40 to 60.
- **Dimensions** include:
  - Total problem
  - Externalization
  - Aggressive behavior
  - Internalization
  - Rule breaking
  - Thought problems
  - Social problems
  - Somatic
  - Anxious
  - Withdrawn

- **Adolescent** data is represented by a solid line with diamonds.
- **Mother** data is represented by a dashed line with squares.

The data suggests differences in perceived problem areas between adolescents and their mothers.
