Figure 2

The figure shows the yield of glucose and xylose over different time periods (5min, 10min, 20min) for various samples. The bars represent the percentage yield, with error bars indicating variability. The samples are labeled as 33A14, 34M95, 33B51, 34M95, 33B51, INL, 33A14, 34M95, 33B51, INL. The data suggests a trend of increasing yield with time for most samples.
