The graph shows the force (gmf) for different genotypes and treatments. The x-axis represents various genotypes and treatments, while the y-axis represents force in gmf. The bars are color-coded, with different symbols indicating significant differences. The treatments include 'Wild type', 'irx9', pVND6:IRX9, pVND7:IRX9, pVND6:IRX7, pVND7:IRX7, and pVND6:IRX8.
