FIG. A2. Relationship between normalized correlation values and structural constraints on duplicated genes in *R. sphaeroides*. Out-paralogs are shown in red circles and in-paralogs are shown in blue squares: (A) In-paralog $K_a$, (B) In-paralog $K_s$, (C) In-paralog $\omega$, (D) Out-paralog $K_a$, (E) Out-paralog $K_s$, and (F) Out-paralog $\omega$.
