Figure 2. Flow chart of the study procedure

311 blood film examined

113 -ve for malaria infection

198 were positive for malaria infection

79 were *P. falciparum* +ve

119 were *P. vivax* positive

32 Excluded

87 Enrolled

7 Excluded

1-Mixed infection on day 2
5-Losses to follow-up
1-Vomiting

80 Analyzed on D7

4-Positive for *P. vivax*

76 Analyzed on D14

6-Positive for *P. vivax*

70 Analyzed on D21

1-Positive for *P. vivax*

69 Analyzed on D28

All were negative
