Figure 1: Overall seroprevalence of *Toxoplasma* infection in pregnant women.

A total of **760** pregnant women were recruited.

- **190** pregnant women were positive for anti-*Toxoplasma* IgG antibodies.
  - **165** pregnant women had past infection for IgG avidity.
  - **25** pregnant women had recent infection for IgG avidity.
- None were positive for anti-*Toxoplasma* IgM antibodies.
