The bar chart shows the percentage of cats in different age groups:

- **0-6 months**: The chart indicates a high percentage of cats, with the error bars suggesting variability.
- **6-24 months**: The percentage is lower compared to the 0-6 months group, with a moderate range indicated by the error bars.
- **> 24 months**: The percentage is the lowest among the three groups, with the error bars showing a smaller range.

The y-axis represents the percentage of cats, while the x-axis displays the age categories of the cats.
