All liver trauma patients (n=398)

Grade I-II (n=334, 84%)

Grade III-V (n=64, 16%)

Study group
Survived > 24 Hours (n=46, 72%)

Liver-related complications (n=22, 48%)

Grade III (n=3)
- Biliary (2)
- Late rebleeding (2)
- Ischaemic cholecystitis (1)

Grade IV (n=12)
- Biliary (10)
- Early rebleeding (1)
- Infectious (1)
- Liver failure (1)

Died
- Liver failure (1)
- MOF (1)

Grade V (n=5)
- Early rebleeding (1)
- Biliary (4)
- Liver failure (1)

Died
- Liver failure (1)

Died within 24 Hours (n=18, 28%)
