Web Services

We offer a set of online web-based tools for access and manipulate your data for free of charge. Some functionalities, such as deleting and accessing private contents, are limited to registered users only. At the moment, the registration system are closed but it will be opened in the near future.

Our current system provide the following online services:

- **Gaussian Log Parser**
  Convert Gaussian log files into various data formats. Your data is stored on our system and is accessible through the World Wide Web.

- **Thermochemistry Calculator**
  Calculate thermochemistry of our data using our RESTful service.

- **CompChem Validator**
  Validate your CompChem document using our simple RESTful web service.

- **Online CompChem Database**
  Collection of Computational Chemistry Data on our system.
