Figure 2. Employer costs by service type, for Commercial Insurance and Medicare Enrollees

Notes:
For sample with 1 year of follow-up.
Medical and drug expenditures were adjusted to 2009 dollars using Medical Care CPI.
The Cost Burden is calculated as the difference between the mean values for the OC/OP/SG cancer and matched comparison group.
The p-value is from a test of statistically significant difference between the OC/OP/SG cancer and comparison group.
