Figure 3 Percentage change of lipid profile in group DC; group DHC; group R and group R+F for one month. Each value is expressed in mg/dl. (^) Significant difference from normal control at P < 0.05. (*) Significant difference from diabetic control at P < 0.05. (#) Significant difference from diabetic hypertensive control at P < 0.05. Means of treated groups with different superscript are significantly different from each other at P < 0.05. Using one way ANOVA followed by Tukey test as post hoc test.
