Total number of subjects invited = 5,000 (50 adults from 100 clusters)

Response rate – 89.5% (n = 4,477)

Prevalence of DM – 11.9% (n = 534)

Number included in study (n = 528)

Exclusion of those with incomplete data (n = 6)

Newly diagnosed DM (n = 191)

Established DM (n = 337)
