Fig. 1

The above images demonstrate increased CBF (arrows) and CBV in the parietal occipital areas with corresponding reduced TTP (arrows) suggestive of increased blood flow in those territories. There was no much observable change in the MTT.

Fig. 2

The above images demonstrate increased CBF (arrows) and CBV in the parietal occipital areas with corresponding reduced TTP (arrows) suggestive of increased blood flow in those territories. There was no much observable change in the MTT.
