Figure 5

(A) Time course of paired-pulse ratio for classes 3, 4, and 5. The graphs show the changes in amplitude (pA) over time (min) following the first and second stimuli.

(B) Graphs illustrating the success rate ratio for each class. The bars represent the mean, with error bars indicating the standard deviation.

(C) Graphs showing the paired-pulse ratio for each class. The bars represent the mean, with error bars indicating the standard deviation.
