**Figure**

The graph shows the relative Gag RNA levels for different miRNAs: NL4-3 let7a, NL4-3 miR211, and NL4-3 miR326. The x-axis represents the three different miRNAs, and the y-axis represents the relative Gag RNA levels. The bars indicate the mean values, and error bars represent the standard deviation. The significance levels are indicated as follows: *** for p < 0.001, ** for p < 0.01, and * for p < 0.05. The orange bars represent the hexamer control, and the blue bars represent the dT control.
