Figure 5  Treatment Strategies for DME

- Treatment strategies for DME
  - Strict blood glucose (6.5-7), lipid (100mg/dl) and blood pressure (130/85) control
  - Laser photocogulation
  - Medical drugs
    - Vascular endothelial growth factor (VEGF) and its receptor antagonist Macugen
    - Anti-VEGF trap
  - Steroids TA OZURDEX fluocinolone acetonide
  - Protein kinase C inhibitor
  - Surgery – vitrectomy
