The diagram shows the results of comparing two groups: No Sleep Medication Use and Sleep Medication use, across different clusters.

- **mPFC cluster**: The difference between the two groups is significant with p < 0.001.
- **dIPFC cluster**: The difference is also significant with p = 0.002.
- **IPC cluster**: The difference is marginally significant with p = 0.06.

Each bar represents the mean with the standard error of the mean (SEM) represented by the vertical lines.
