The image shows histological sections of the esophagus mucosa from different groups:

- **a** naive
- **b** Sham
- **c** EPIT
- **d** stripping + EPIT

**e** eosinophil infiltration into esophagus mucosa

The graph below illustrates the eosinophil infiltration per mm$^2$ for each group:

- Naive
- Sham
- EPIT
- Stripping + EPIT

Significance levels are indicated as follows:

- *: p < 0.05
- **: p < 0.01
