**At risk group**

- Predisposition: genetic +/- epigenetic

**Relevant exposure**

- Exposure leading to sensitisation

**Diseases**

- ABPA
- ABPM
- SAFS

**Complications**

- Bronchiectasis
- Chronic pulmonary aspergillosis with fibrosis
- Poor asthma control

**Exacerbating factor(s)**

- Airway fungal infection(s)
- Recurrent fungal impaction
- Bacterial infection(s)

---

**At risk group**

- Predisposition: genetic +/- epigenetic

**Relevant exposure**

- Specific fungal exposure or infection, ie with viral infection, or skin/mucosal infection

**Exposure outcomes**

- Sensitisation only
- Allergic disease ie ABPA, ABPM, SAFS

**Exacerbating factor(s)**

- Airway fungal infection(s)
- Recurrent fungal impaction
- Bacterial infection(s)

- Bronchiectasis
- Chronic pulmonary aspergillosis with fibrosis
- Poor asthma control
