A. 

[Graph showing [3H] thymidine incorporation (% of basal) with bars representing different treatments including ATP (0.1 mM), Pl. extracts (32 µg/ml), suramin, MRS2179, MRS2211, and DIDS.]

B. 

[Graph showing number of migrated cells with bars representing different treatments including Pl. extracts (32 µg/ml), ATP (0.1 mM), suramin, MRS2179, MRS2211, and DIDS.]

C. 

Table with images representing control, suramin, MRS2179, MRS2211, and DIDS treatments.
