</table>
| Language | E.g. English  
|---------|-----------------  
|         | English language only  
| Types of studies to be included | E.g. qualitative studies  
|         | Randomised-controlled trials (RCTs)  
|         | Quasi-experimental studies  
| Inclusion criteria (why did you include it?) | Types of participants  
|         | Inclusion criteria  
|         | 16-65 yrs  
|         | With schizophrenia or related psychosis (as diagnosed using any recognised diagnostic criteria e.g. ICD-10; DSM-V)  
|         | With social anxiety disorder (as diagnosed using any recognised diagnostic criteria e.g. ICD-10; DSM-V)  
|         | Exclusion criteria  
|         | <16 yrs or >65yrs  
|         | Primary diagnosis of organic brain disorder  
|         | Types of trials  
|         | Randomised controlled trials and quasi-experimental designs.  
|         | Types of interventions  
|         | Cognitive Behavioural Therapy  
|         | Cognitive Therapy  
|         | Cognitive Behavioural CBT  
|         | Both group-based and individual  
|         | Control conditions  
|         | Control conditions will include any other intervention, no intervention/usual care and waiting list  
|         | Types of Outcomes  
|         | Primary Outcome: Social anxiety symptoms  
|         | Secondary Outcomes: General anxiety; distress; depression; positive and negative symptoms of schizophrenia; quality of life; cost of CBT intervention  
| Exclusion criteria (why did you rule it out?) | Systematic reviews, dissertations/theses or studies describing a CBT intervention but not providing any evaluation will be excluded.
