The graph shows the relationship between bodyweight (kg) and anakinra dose (mg/kg/day). The blue line indicates the following doses:

- 3.9 mg/kg/day
- 3 mg/kg/day
- 2.4 mg/kg/day
- 2 mg/kg/day
- 1 mg/kg/day
- 100 mg/day

The x-axis represents bodyweight (kg), and the y-axis represents anakinra dose (mg/kg/day). The graph is divided into different sections based on these values, indicating the appropriate dose range for different bodyweight categories.
