Ni Concentration vs. Growth over Time (Day)

- Ni Concentration (mg/ml) on the y-axis, ranging from 564 to 704.
- Growth (OD 560nm) on the y-axis, ranging from 0 to 0.1.
- Time (Day) on the x-axis, ranging from 0 to 5.

The graph shows a decrease in Ni concentration followed by a steady increase in growth over time.
