Clinical Trials Unit
Reviewing Trials of Interest to Patients with Kidney Disease
Facilitating CANN-NET priority trials
- Intensive versus liberalized phosphate control in hemodialysis recipients
- The impact of aldosterone antagonism with Eplerenone on hemodialysis patients

Knowledge User Committee:
Determine priority areas for knowledge translation and areas where new knowledge is needed:

Knowledge Translation Priorities
- Timing of dialysis initiation
- Appropriate use of home dialysis

New Trial Priorities:
- Reducing cardiovascular risk in dialysis patients

Ad Hoc Clinical Practice Guidelines Working Group:
- Timing of dialysis initiation guidelines

Knowledge Translation Committee Activities:
- Timing of dialysis initiation
- Appropriate use of home dialysis

Partners (project specific)
Canadian Society of Nephrology (CSN)
Canadian Society of Transplantation
Canadian Association of Nephrology Administrators (CANA)
Canadian Association of Paediatric Nephrology (CAPN)
Renal Pharmacist Network
Canadian Hypertension Education Program (CHEP)
Australasian Kidney Trials Network (AKTN)
Canadian Network and Centre for Trials Internationally (CANeCTIN)
