596 patients
65 ± 16 yrs
M/F = 1,6

84 WoWt patients
71 ± 14 yrs
M/F = 3,2

76 foreseeable circulatory arrest deaths
71 ± 15 years
SAPS II: 70 ± 19
ICU: 18 days (1-122)

8 discharged from ICU

20 contraindications existing on ICU admission

24 contraindications emerged during ICU stay

32 theoretically eligible patients based on medical criteria for graft selection

27 WoWt without life support withdrawal

5 WoWt with life support Withdrawal

3 deaths occurring within 2 hours from withdrawal

2 deaths occurring > 2 hours after withdrawal

512 non-WoWt patients

420 discharged from ICU

67 unforeseeable circulatory arrest deaths
68 ± 15 yrs
SAPS II: 81 ± 24
ICU: 7 days (1-53)

2 deaths occurring > 2 hours after withdrawal

27 WoWt without life support withdrawal

25 confirmed brain deaths
70 ± 11 yrs
SAPS II: 63 ± 10
ICU: 4 days (1-11)

No medical contraindication to donation (regardless of age)
