The graph shows the relationship between time (hr) and the concentration of Lactic acid (g/l) and DCW (g/L) over a period of 600 hours. The data is represented by points, and a linear trend line is fitted to the data with the equation $y = 1.0084x$. The coefficient of determination, $R^2$, is 0.9927, indicating a strong linear correlation between the variables.
