Figure (a) shows the effect of cinnamaldehyde on the 
A600 of C. albicans 04 and E. coli SA01. The A350 of unbound 
cinnamaldehyde decreases as the A600 of cells increases.

Figure (b) demonstrates the effect of eugenol on the 
A600 of C. albicans 04 and E. coli SA01. The A350 of unbound 
eugenol decreases as the A600 of cells increases.
