Figure 4

A

![Graph showing survival fraction (%) against concentration of F3 (μM). The graph compares BnDTPA-F3 and 111In-BnDTPA-F3.]

B

![Bar graph illustrating surviving fraction (%) with different concentrations of 111In-BnDTPA-F3 and equivalent amounts of 111In chloride. The concentration ranges from 0 to 9 MBq/μg.]

- **(111In)-BnDTPA-F3**
- **Equivalent amount 111In chloride**

Surviving fraction (%)
