Figure 6

A) Relative tumor volume over time (days) for Control (PBS), BnDTPA-F3, and In-BnDTPA-F3. The graph shows a significant decrease in tumor volume for the treated groups compared to the control.

B) Growth rate K (mm$^3$/day) for Control, BnDTPA-F3, and In-BnDTPA-F3. ANOVA p = 0.0228 indicates a statistically significant difference between groups.

C) Percent survival over time (days) for Control, F3, and In-F3. The graph shows a significant increase in survival for the treated groups with p = 0.0073.

D) Percent survival for control, BnDTPA-F3, and In-BnDTPA-F3 over time (days).
