The bar chart shows the distribution of sensitivity levels among a population. The chart includes the following categories:

- **Sensitive**: 85% of the population
- **Intermediate**: 3% of the population
- **Resistant**: 12% of the population
- **Total**: 100% of the population

The chart indicates that 85% of the population falls into the sensitive category, 3% into the intermediate category, and 12% into the resistant category. The total population is represented by 100%.
