Fine root biomass (t ha\(^{-1}\)) vs. Depth (cm) for Poplar and Herb.

- For Poplar:
  - Equation: \(y = -0.69 \ln(x) + 2.9\)
  - \(R^2 = 0.85\)

- For Herb:
  - Equation: \(y = -1.60 \ln(x) + 6.1\)
  - \(R^2 = 0.91\)
