Figure 2. Solutions of electricity generation amounts

- The electricity generation amounts of the coal under the two reliability scenarios
- The electricity generation amounts of the gas under the two reliability scenarios
- The electricity generation amounts of the hydropower under the two reliability scenarios
- The electricity generation amounts of the windpower under the two reliability scenarios
- The electricity generation amounts of the nuclear under the two reliability scenarios

T- Represents the time period where t1, t2, and t3 denote the periods 1, 2, and 3, respectively
α-cut level - Represents the confidence levels
